Prevention strategies

Pressure injury wound assessment

Management strategies

Documentation

Guidelines & Surveillance

Patient /Carer education

Assessment

Refresh your knowledge and complete the
10 multiple choice questions.

Work Place Project

- The pressure injury session incorporated comprehensive material over 10 modules. From your learning experience select 5 topics which delivered new information or refreshed your existing knowledge.
- Prepare a short (10 minute) presentation or fact sheet or editorial critique summarising the topics you have selected.
- The presentation, fact sheet or critique of your learning should be shared with your colleagues, manager, friends, family or your partner. This can be an informal or formal education session or a relaxed discussion.
