

WOUND EDUCATION

CLINICAL TRAINING MADE EASY[©]

TRAINING SESSION 9

CONCLUSION & WORK PLACE PROJECT

Session 9 Summary

Attempt to list 3 points for each topic

1. Leg ulceration

Defining, Aetiology, Impact

2. Diagnosis

- Venous, Arterial & Mixed

3. Treating leg ulceration/Atypical

4. Treating

- Lymphoedema
- Venous Leg Ulceration

5. Managing Oedema & Compression

6. Clinical issues associated with compression

7. Reducing recurrence & Patient education

Assessment

Refresh your knowledge and complete the
10 multiple choice questions.

Work Place Project

Session 9 has highlighted that compression is the gold standard to treat leg ulceration with a diagnosis of chronic venous insufficiency.

1. Review the compression that is available in your healthcare setting
2. Review the product information leaflet or product website and learn about your workplace compression product/s
3. List the benefits & indications
4. List the limitations & precautions associated with the product.
