

# WOUND EDUCATION

CLINICAL TRAINING MADE EASY<sup>©</sup>

TRAINING SESSION 10

INTRODUCTION & PRE-ASSESSMENT

Diabetes Related Foot Disease

# Learning Outcomes

On completion of this training participants will:

- Recognize the negative impact diabetes is having on people living within Australia
- Identify evidenced-based guidelines for the assessment, prevention & management of people at risk of developing or are currently suffering with diabetes related foot disease
- Monitor and advocate for the patient to gain best practice with early escalation to reduce the infection and amputation risk.

# Pre-Assessment Prior Knowledge Brain Storm

Attempt to list 3 points for each topic

1. Diabetes Related Foot Disease & Impact
